

WHY USE *Ag Lime*?

To create the foundation for a healthy lawn and agriculture crops establishing and maintaining proper soil pH which is the foundation for a healthy green lawn and agriculture crops. Lawn and crops grows best at a soil pH between 6.5 and 6.9. Soil pH will naturally decline over time due to excessive rain, acid rain, irrigation and soil erosion.

HOW DO I KNOW IF I NEED *Ag Lime*?

If you have *bare spots*, *excessive weeds*, or *your acreage is not as green* as you would like it to be, you probably *need* an application of *lime*.

HOW TO APPLY *Ag Lime*?

! *Determine the area of acreage:*

An easy way to do this is to walk the length of your area, figuring that one pace equals about 3 feet. Do the same with the width of the lawn. Multiply length by width to arrive at the total square footage.

! *Application rate:*

Apply one bag per 1,000 sq. ft. to maintain soil pH and two bags per 1,000 sq. ft. to correct acidic soils.

Spreading the time: Spread uniformly with a drop spreader, by hand, shovel or rototiller.

Lime's particle size makes it easy to distribute evenly.

! *Application for new Lawn:*

Apply Lime at the same rate as established lawns. After application, work the Lime into the soil to a depth of 4" to 6" before seeding or nodding.

! *Application for Flower and Vegetable Gardens:*

Apply 25lbs per 100 sq. ft. or as indicated by soil testing.

CORPORATE OFFICE:

Churchill Roosevelt Highway, Arouca, Trinidad, W.I.
Tel: (868) 646-3682 Fax: (868) 642-9161 Website: www.nqcl.co.tt

AGRICULTURAL LIMESTONE *(Ag Lime)*

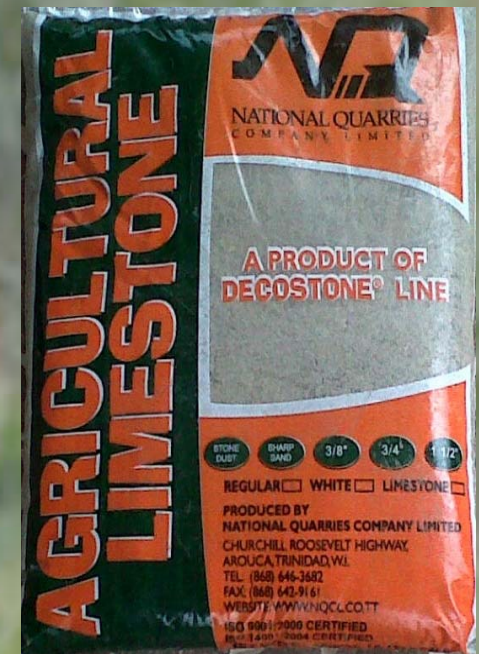

***"the farmer's friend
the landscaper's partner"***

Increase your crop's yield

Increase your produce's shelf life

Increase your profit

Increase the lushness of your lawn

The Benefits of NQ's *Ag Lime*

1. Water proof packaging minimizes dusting in storage areas.
2. Packaged in 40lb bags making it easier for farmers to carry around and work with
3. Corrects the pH of acidic soils
4. Supplies Ca (calcium) to high calcium crops
5. Improves fertilizer efficiency, by increasing the uptake of nitrogen, potash, sulphur, phosphorus, calcium, magnesium, copper, boron, zinc and molybdenum
6. Improves soil structure, thus increasing micro and macro organism activity. There is reduction of crusting and clodding of heavy soils
7. Reduces the need for costly, environmentally hazardous and toxic chemical fertilizers
8. Due to its texture, can maintain proper pH for years

WHERE TO PURCHASE NQCL'S *Ag Lime* EAST

LOCATION	COMPANY	CONTACT#
Arouca	National Quarries Company Limited	646 3682
